1.0 INTRODUCTION

Kazi Investment Group, LLC (KIG) and its partners provide comprehensive, holistic and integrated security, technology and project management solutions for governments, businesses, and other organizations in a world of rapidly changing threats. We also have extensive experience in both corporate and military construction projects, infrastructure development, life support services, aircraft overhaul/modernization and supply chain management solution.

To complement the global nature of our clients, KIG has established a successful multinational disciplined practice, as well as an unparalleled network of alliances and partnerships around the world. KIG often provides mission-critical systems, solutions, and services in difficult and demanding theatres of operation such as Pakistan, Afghanistan, Africa, Mexico, Central and South America, and several central Asian countries.

KIG has offices in Orange County, CA, Washington DC, Tampa, London, Dubai, Kabul, Karachi, Lahore, and Islamabad, as well as current operations in Germany, Lithuania, Kazakhstan, Georgia, Afghanistan, Pakistan, UAE, and Central and South America.

2.0 PROJECT MANAGEMENT

Clients look to KIG to deliver complex projects in challenging locations and environments around the world. KIG's project management expertise comes to the forefront on every job in each phase of the project combining project initiation, project planning/development, project execution/production, monitoring and control, and ultimately in project closure and completion.

KIG transforms clients' goals into reality, providing a range of high quality, cost-effective project management and operational services to each client's organizations, agencies and engaged private contractors. KIG tailors its services to client needs, providing one-time solutions to comprehensive, long-term management support.

KIG often serves as overall program manager on large-scale capital projects involving billions of dollars of goods and services in challenging locations. As the client's single point of contact, KIG integrates the activities of all contractors and subcontractors, often from diverse backgrounds and cultures, to ensure the success of the overall program.

KIG is consistently regarded as a leading “small business” enterprise in the global defense and building industry. KIG is recognized for its ability to deliver projects safely, on time, and within budget. One of the reasons clients choose KIG is its ability to provide all the necessary services in-house, eliminating the need for multiple consultants. This capability is changing the face of program management. KIG’s fully integrated teams offer services and support in design, construction, procurement, project controls, safety, quality, and, operations and maintenance.

KIG has established systems, tools, procedures, and processes in place consistently applied to projects in diverse locations. These project management tools are available 24/7 to KIG’s team.

Across linguistic, cultural and international lines, KIG offers a complete array of project management services, including:

- Mobile turn-key camps and hospitals
- Designing projects and preparing annual action plans, using in-house expertise or external consultants
- Identifying, recruiting and managing human resources, ranging from individual internationally or locally hired experts to large numbers of field personnel for pro-poor, labor - intensive projects; KIG uses internationally accepted procedures for competitive selection of consultants, contractors and suppliers
- Financial management, including provision of accounting services and customized reporting per client requirements; KIG operates under U.S. and international financial regulations and rules
- Establishing and conducting monitoring and evaluation systems, and reporting on project implementation

3.0 LOGISTICS & SUPPLY CHAIN MANAGEMENT

KIG's supply-chain management components are augmented by in-country, on-the-ground inspection and surveying by KIG personnel and its enhanced network of teaming partners. KIG's logistics advantage is experience; relevant, recent experience in the difficult business environments in which our clients operate. KIG's comprehensive services are developed specifically to meet the challenges governments and organizations face in logistics and supply-chain management. KIG conducts business in areas of the world that are most complex to include conflict zones, unstable regions and remote outposts.

By supporting our logistics and supply-chain management services with an in-house intelligence and risk management capacity in all areas of your operation, KIG can reduce risk of loss, ensure operational goals are met, and at the same time maintain efficient and streamlined delivery times.

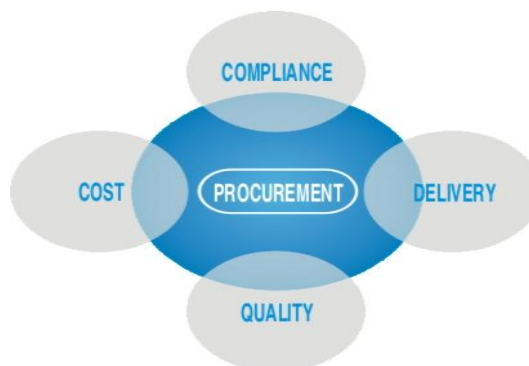

Our logistics team's experience covers all major components of logistics supply chain management including but not limited to:

- Enhanced Freight Forwarding and Carrier Networks
- Storage and Warehousing Facilities
- Import/Export Documentation tailored for each local region/province
- Export Compliance (including ITAR expertise)
- Customs Clearance
- Enhanced Real-time Consignment Tracking

4.0 PROCUREMENT

KIG provides full procurement capability from cost effective markets across the globe. KIG procurement is fully integrated with our logistics and supply chain management services, particularly in support of deployed operations in third world theatres where obstinate and opaque bureaucracies, rough & inaccessible roads, and other common third world infrastructure obstacles often pervade supply routes.

Frequently procured products include:

- Mobile turnkey camps and hospitals
- Pre-fabricated structures
- Construction materials and equipment
- Sewerage and sanitation plants
- Small plant equipment and tools
- Hardware, stationary, and IT supplies
- Generators and electrical accessories
- B6 level armoured vehicles
- “Soft Skin” vehicles
- Bulk and fresh food / packaged water and other consumable liquids, MREs
- Security and military equipment including fire fighting equipment, ballistic gear, night vision radar, FLIR, high-speed watercraft, and UAVs
- Medical supplies and equipment
- Petroleum, Oils and Lubricants

5.0 MI-17 LOGISTICS CAPABILITIES

KIG has been involved in Mi-8 and Mi-17 overhaul and repairs for a number of years. Over this time, we have built up a core team of highly experienced certified professionals with decades of handling all aspects of operations, maintenance, repairs, logistics, and aviation parts supply chain management. The geographical scope of these projects includes *Pakistan, Afghanistan, Russia, Germany, US, Lithuania, and Czech Republic*.

Qualifications of our personnel:

- Experienced retired Officers and Technicians where the junior most member has 20 years of experience
- Experience in establishing MI-8 partial overhaul facility in Pakistan
- Project Management experience from conception to completion
- Quality Management experience (QC and QA)
- HR Management and Office Administration experience
- Experience of conducting training in army institutions

KIG is capable of supporting Bell 212, 412, UH-1, AH-1; Eurocopter Puma, and Super Puma, as well as Alouette variant helicopters. We are also experienced supporting fixed wing C-26, C-27, and C-12 variants.

KIG has been a core player in the US DOD CNTPO program for the repair, overhaul, and refurbishment, and logistics under several task orders where KIG has made several specialized recoveries of crashed/unserviceable aircraft.

KIG's multi-lingual and OEM certified teams review the passports and log books of each aircraft and its components prior to shipment and prepares a Discrepancy List which greatly simplifies the job of the overhaul facility.

KIG provides complete disassembly and re-assembly services of helicopters for loading on charter flights and receiving at destination. KIG provides a complete in-country support solution using LNs and TCNs.

KIG can handle all aspects of receiving the aircraft, completing all the documentation and paperwork, arranging the cargo transport, and delivering it to the selected overhaul facility.

KIG has a well-established operational track record in placing complex insurance in high risk areas at extremely competitive rates which greatly lowers the risk. KIG also has immediate access to various cargo aircraft for rapid delivery into austere and hostile operating environments.

KIG understands how to operate in countries like Afghanistan, Pakistan, and the former Soviet bloc countries while keeping in view US Government requirements, ITAR and export restrictions, and the requirements of the project and the customer. All of this translates into a smooth project execution, within budgeted time and costs, with an assured level of service and quality.

5.1 SPECIAL PROJECTS EXAMPLES

5.1.1 RECOVERY OPERATION IN KANDAHAR, AFGHANISTAN

The KIG team was on the ground for special recovery. The aircraft was disassembled and loaded onto an IL-76 and transported to MRO in Russia for overhaul.

This aircraft is has been delivered back to Afghanistan and has resumed full flight operations.

5.1.2. RECOVERY OPERATION IN TARBELA, PAKISTAN

This aircraft was recovered, ground transported a distance of almost 80 kilometers through a hostile environment, disassembled, and loaded and transported via IL -76 for repairs.

5.1.3 TURN-KEY LOGISTICS, TRANSPORTATION AND DISASSEMBLY/ASSEMBLY: PAKISTAN-EASTERN EUROPE

KIG provided logistical support for all aircraft movements to include coordination with freight forwarders, commercial airlines, US Government personnel and various airfields as well as providing life support, billeting, transportation, & PSD services for overhaul teams in Pakistan.

The efforts included chartering IL76 and AN124 aircrafts, obtaining export and re-import permissions from all countries involved, dismantling and re-assembling the Mi-17 aircrafts, loading the helicopters, coordinating secure transportation to and from airfields as well as provision of safe houses, armored vehicles and personnel security details for all individuals working on the program.

5.1.4 TURN-KEY LOGISTICS, TRANSPORTATION AND DISASSEMBLY/ASSEMBLY: PAKISTAN-AFGHANISTAN

KIG provided logistical support for all aircraft movements to include coordination with freight forwarders, commercial airlines, U.S. Government personnel and various airfields as well as providing life support, billeting, transportation, and PSD services for transport teams in Pakistan and Afghanistan.

The efforts included lengthy transportation and ground convoy in Pakistan, chartering IL76 aircraft, obtaining export and import permissions from Pakistan and Afghanistan respectively.

Efforts also included the dismantling and re-assembling the MI - 17 aircrafts, loading the helicopters, coordinating secure transportation to and from airfields as well as provision of safe houses, arranging permission for base access for the technical team, armored vehicles and personnel security details (as needed) for all individuals working on the program.

6.0 SECURITY SERVICES

Team KIG offers a full range of security and consulting services across the spectrum to include advice, analysis, risk assessment, technology assessment, development, planning, deployment and specialized training for security and defense sector programs.

Through our in-country infrastructure and onsite resources in the United States, Pakistan, and Afghanistan, KIG is able to support multi-national operations around the world and assist our clients to manage their respective programs through the provision of specialized technology, strategic security and consulting services.

KIG provides a range of consultancy and manpower support services to government and corporate clients to improve capability and ensure security:

- Risk assessment and Security consulting
- Business Intelligence
- Incident Response and Crisis Management
- Personnel Protective Services and CP (PSS)
- Emergency Response Team Services (ERT)
- Site Security Services
- Guard and Driver Training Services
- Key Asset Protection
- Terrorism Prevention and Response
- Specialized Personnel Training
- Investigative Services including Vetting of National and International Staff
- Major Security Systems Architecture and System Design
- Interpreters, Linguists and Facilitators

7.0 ENGINEERING AND CONSTRUCTION

KIG provides a full suite engineering and construction services for its government and corporate clients including pre-planning, design, engineering, construction and installation, post-construction analysis and troubleshooting.

Projects range from installation of pre-fabricated housing units to construction of frontier military compounds to construction and implementation of high technology security boundary systems and coast guard FLIR equipment and information fusion centers.

Projects frequently require that KIG seamlessly integrate low technology with a variety of high technology products and solutions to provide KIG's government customers turn-key facilities.

These projects frequently require the complete build-out of small camps including dining facilities, sleeping quarters, vehicle maintenance center, communications systems, hardware and software information technology systems, medical facilities, and warehousing (including inventory management systems).

Some of the KIG Construction Projects include:

- Afghan National Army Air Corp Warehouse
- Pakistan Frontier Corp Training Center
- Pakistan Coast Guard (PCG) Makran Coast Observation Towers
- Ghana Wharf project
- Senegal Elinkine Wharf Construction
- Afghanistan AIU Housing

8.0 LIFE SUPPORT

KIG offers personnel, equipment, and services for the operation of state-of-the-art secure compounds in Afghanistan, Pakistan and other countries offering world class amenities which facilitate life support to international contractors who are mobilizing and stationed in active, hostile theatres for operations against the global war on terror and narcotics as well as training and education of in-country civilian security personnel.

Our team provides turn-key camp solutions and related on-going support which are individually tailored to the specific situational needs of the client including but not limited to:

- Health, Medical, and Safety Provisions
- V-sat, internet and IT
- Fleet management of Up-Armored and Soft Skin Vehicles.
- Commercial Cleaning
- Waste Management
- Catering & Food Supply Services
- Landscaping
- Laundry Services
- Pest Control
- Health and Safety programs
- Water supply
- Provision of Vetted Support staff – Linguists, Drivers, Secretaries

9.0 VEHICLE ARMORING & MAINTENANCE

KIG through its subsidiary Innovative Auto Services is focused on providing the highest quality, yet cost effective handling of scheduled and unscheduled vehicle and equipment maintenance, meeting our customers' needs.

Our experience in repair and maintenance of light, heavy, specialized, armored and soft skin vehicles and equipment is unrivaled. IAS Service Center has the latest state-of-the-art equipment and specializes in offering a first-rate service for your vehicle and equipment maintenance requirements. We are known for our continuous commitment to provide a quality service for our customers.

KIG Services Include:

- Fleet Management
- Scheduled and Unscheduled Maintenance
- Genuine Spare Parts Supply
- Air-Con Service and Repair
- MOI Registration and Licensing
- Armored Vehicle Specialist
- Body and Paint Shop
- Armored Cars Sales and Leasing
- Standard and Comprehensive Service Contracts
- Scheduled and unscheduled maintenance on a non-contractual basis
- Extensive inventory of genuine spare parts including a large stock of ballistic glass
- Authorized installer of upgraded alternators

Our Service Centers offer:

- State-of-the-art diagnostic and test equipment.
- Fast and efficient supply chain systems.
- Links with major vehicle manufacturers and armoring companies.
- Vast experience in B6 Level armored vehicle maintenance and repairs.
- Fully trained Technicians.

10.0 INFORMATION TECHNOLOGY & COMMUNICATIONS

KIG provides its customers effective IT and communications installation and support services for optimum operation of their offices, facilities, camps and other operating venues constructed and/or serviced by KIG. KIG's approach uses the latest in planning, scheduling and tracking systems commercially available. We have executed a large number of contracts requiring communication and network operation centers providing 24x7x365 monitoring of networks operations, security, disaster recovery and large-scale inventory management system.
